

Education

2010 - 2016

Master in Social Informatics from Institute of Applied System Analysis (Kyiv Polytechnical Institute)

I have worked with

Programming languages	Scala, Python, Rust, Java, JavaScript, TypeScript, Groovy
Frontend frameworks	React, Redux, Vue.js, JQuery, Bootstrap
Backend frameworks	Tapir, Akka (Streams/HTTP), Dropwizard, Express, Flask, Spring Ecosystem, EJB, JPA (Hibernate), JBPM
Relational DBMS	MySQL, PostgreSQL, MS SQL, Oracle
NoSQL databases	BigQuery, Druid, DynamoDB, (Elastic Open)Search, Cassandra, Apache Kudu/Impala
Data processing/ETL frameworks	Spark, Airflow, Presto, AWS Glue, AWS Data Pipeline
Messaging	AWS Kinesis, Kafka, JMS
Cluster/Resource managers	Kubernetes, YARN, Mesos/Marathon
DevOps, Logging and Monitoring	AWS Cloudwatch, Datadog, Terraform, Gitlab CI, Jenkins
Cloud services	AWS, Google Cloud

Languages

English (Advanced), German (Intermediate), Japanese (Beginner)

Experience

Company	WalkMe
Duration	July 2019 - present
Project	Data infrastructure platform development. The platform backs company's datalake, analytics and reporting services. The platform consists of pipelines processing high volumes of data, as well as from services providing APIs for analytics queries. Additionally, there are ML services based on Google's Vertex AI platform.
Role	Data infrastructure team leader
Technologies	Kubernetes, Google Cloud (Dataproc, BigQuery, GKE, Vertex AI, and other), AWS (EMR, EC2, VPC, EKS, Lambda, and other), Druid, Scala, Rust, Python, Airflow
Company	Qvantel Oy
Duration	February 2018 - June 2019
Project	BSS (Business Support Systems) targeted for Telecom operators
Role	Senior Software Engineer
Technologies	Scala, Akka (HTTP/Streams), Cassandra, Kafka, Mesos/Marathon, Kudu/Impala, JavaScript, React, Redux
Company	EPAM
Duration	May 2017 - February 2018
Project	ML based recommendation system for big scientific literature publisher
Role	Tech lead / Data engineer
Technologies	Scala, Python, Dropwizard, Akka (HTTP/Streams), Terraform, Spark, EMR, AWS Data Pipelines, Lambda, Kinesis Streams, Elasticsearch, RDS
Company	EPAM
Duration	September 2015 - May 2017
Project	E-commerce system for the biggest Canadian hiking and sport goods retailer
Role	Senior Software Engineer
Technologies	Java 8, Hybris, Spring, JMS, JUnit, Oracle, Tomcat, Ant, Maven, JAXB, Infinispan, Red Hat Data Grid
Company	EPAM
Duration	May 2015 - September 2015
Project	E-commerce system for Canada's biggest electronics retailer
Role	Software Engineer
Technologies	Java, Hybris, Spring, JUnit, MS SQL, Tomcat, Ant, JAXB
Company	Globallogic
Duration	January 2015 - May 2015
Project	Computer networks discovery and reconciliation system targeted for Telecom operators
Role	Software Engineer

Technologies	Java, EJB, Spring, Hibernate, JMS, JUnit, Oracle DB, Weblogic, Ant, Gradle, JBPM, Groovy, Python, JAXB
Company	NetCracker Technology
Duration	August 2014 - December 2014
Project	Migration of OSS/BSS to open source platform
Role	Software Engineer
Technologies	Java Core, EJB, Spring, JUnit, Mockito, EHCache, Oracle DB, PostgreSQL, Weblogic, WildFly AS, Ant, Ivy, GWT
Company	NetCracker Technology
Duration	April 2014 - August 2014
Project	Error handling framework for OSS/BSS of Deutsche Telekom
Role	Software Engineer
Technologies	Java Core, JMS, Maven, XML, XPath, Web Services, Oracle DB
Company	NetCracker Technology
Duration	March 2013 - April 2014
Project	Order management system for large US Telecom provider
Role	Junior Software Engineer
Technologies	Java Core, EJB, JSP, AJAX, JavaScript, Maven, Jenkins, XML, JasperReports, Oracle DB
